Why IceWarp?

Ultimate All-in-One E-mail and Collaboration Platform

1 Quality/Price Ratio

Low cost and transparent software maintenance makes IceWarp Server ideal solution for corporate communication and collaboration. The more license you buy the better unit price you get.

2 Flexible and Stable

We grew up on the installation for thousands users. The core of the system is therefore ready for a significant burden and large number of users. The system is optimized and does not need high hardware requirements.

3 Hosted on Your Server or in Cloud

We offer several deployment options, giving you the flexibility to leverage IceWarp based on the preferences that best suits your business needs and your budget. IceWarp is available as hosted on your server or in Cloud with several different locations.

4 Individual Technical Support

Experienced international technical support team is available to help you 24/7 to solve your problems. You can always rely on assistance directly from the software developer.

5 More Than 15 Years of Experience

We are stable player on e-mail and communications server market. Large international companies as well as SMB companies belongs to the list of more than fifty thousands customers.

About IceWarp

IceWarp is a stable international company operating in the market since 2001 and is developing a complex solution for communication and collaboration. Our goal is a continuous process of innovation considering current trends and requirements of **more than 50 000 customers**.

SMB

Low Costs and Easy Administration

Enterprise

Secure All in One Solution

Service Providers

Wide Range of Customization

Version 12

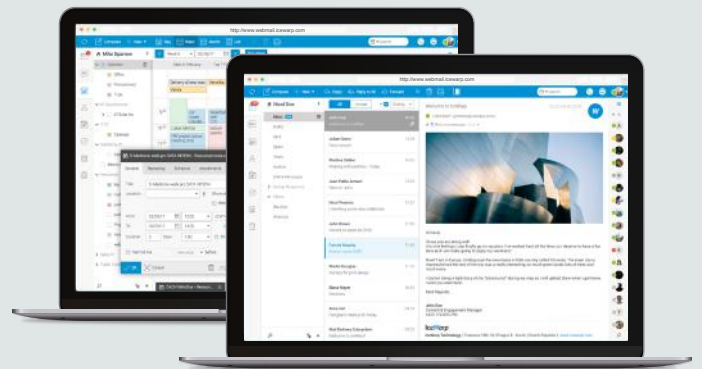

All-in-One Within Modern Design

IceWarp integrates **all communication & collaboration features in one** unified solution integrated in the **modern interface**. Basic server management including **whitelabeling** is accessible also from a single place – WebAdmin.

Email and Calendaring

Much More than E-mail

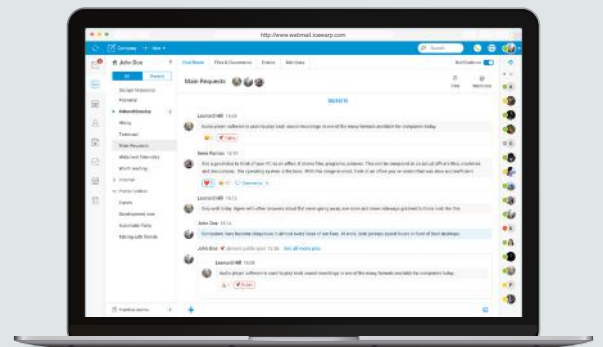

A complete suite of productivity web applications including Email, Calendaring, Documents, Spreadsheets, Presentations, TeamChat, WebChat, Voice and Video calls and secure online Storage.

TeamChat and VideoCalls

Real-Time Messaging

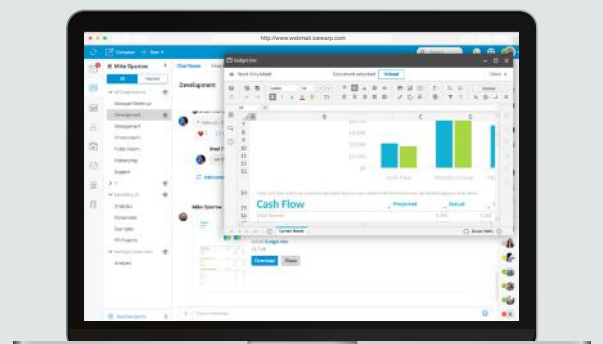

TeamChat allows users to have conversation with different groups of people at once, plan meetings, conference calls, webmeetings or edit documents together. External guest can join for free.

Storage and Documents

Powerful Office Suite on the Web

Documents, spreadsheets and presentations are manageable online without the need to install an Office suite. All files are stored in one place so FileSync can easily synchronize them to your PC and keep them up-to-date.

Version 12

Simple Collaboration

Scheduling and Agenda Sharing

Collaboration With Others

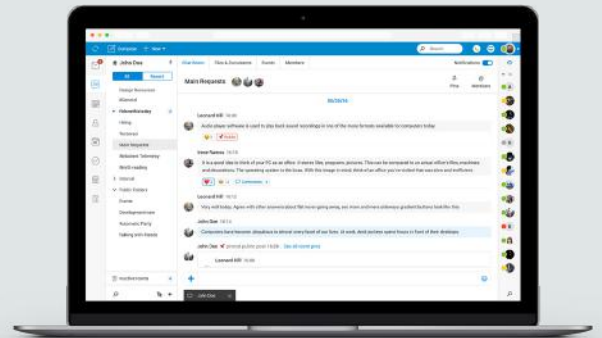

Email, shared calendars, contacts, tasks and notes in one easy to use package. All applications are connected together letting users multitask without any tabs or windows switching.

TeamChat

Collaboration in Teams

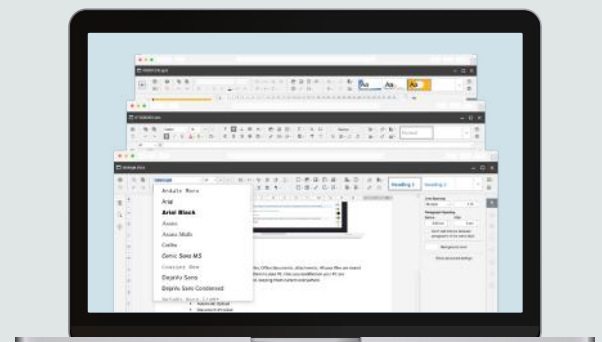

Real-time messaging and collaboration for teams & projects. It lets you get in touch with other people on the team, organize your conversations around one topic, share files or create ad-hoc meetings.

WebDocuments

Collaboration on Docs

Create a new document, spreadsheet or presentation in a single click or simply upload your files using drag and drop to share them within the team, then edit them online together.

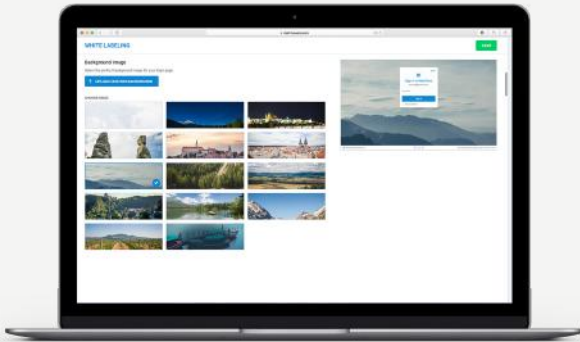

Multi-layered Security

Secure Collaboration

A unique combination of world class multi-threaded Anti-Virus and multi-layered Anti-Spam protection stops malicious or unwanted behavior in real time. Administrator tool makes management of mobile devices and client applications easier and prevent its misuse.

Version 12

Accessible Everywhere

WebClient and WebAdmin

Email and Administration Online

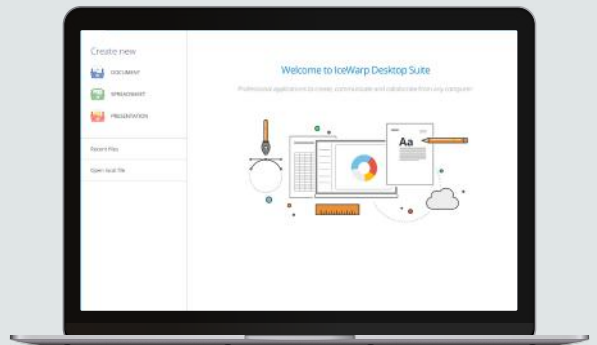

Intuitive WebClient and powerful WebAdmin allows you to work anywhere in the same way like from the desktop. You can securely access both interfaces from all well-known web browsers.

Dektop Suite

Office Suite Available as Installed Apps

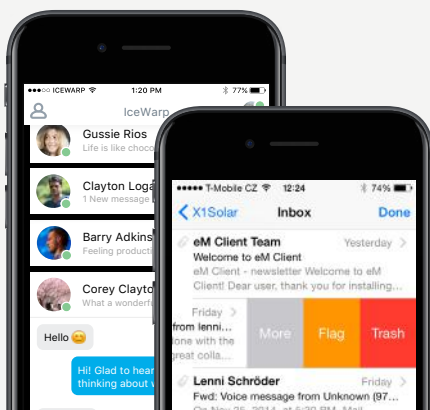

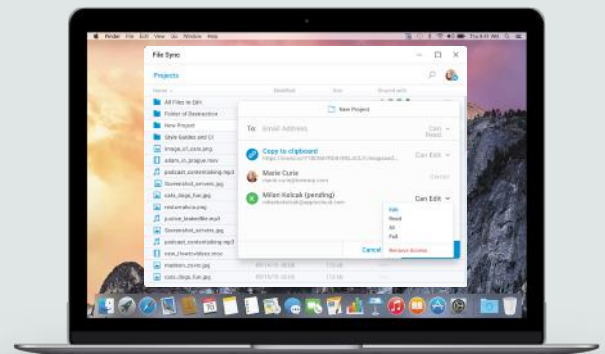

Package of software including an offline office application suite working within a desktop. It combines Desktop Email, Desktop Documents, Desktop Spreadsheets and Desktop Presentations.

FileSync and Desktop Apps

Fully Installed Useful Apps

Our own desktop apps allowing you to ease your work from the desktop, when communicate with others. FileSync helps you synchronize and share files while TeamChat Desktop lets you work with multiple TeamChat accounts at once.

IceChat and Mobility

Always Connected with Mobile Apps

With full support for Exchange ActiveSync users can safely synchronize email, calendar and contacts with any mobile device. Install IceChat for iOS and chat on the go, instantly share photos or your location from your iPhone.
