NovaBACKUP Software for Workstation, Server & Database Backup and Virtual Machines

Professional Data Protection. Simple, Fast and Reliable

Backup for Windows

NovaBACKUP Server is a reliable and cost-effective data protection and recovery software to protect critical information stored on your Windows server system. Create and manage easily your backup procedures and automated schedules. With detailed instruction wizards and fast installation, your business will be safe within minutes without the requirement for an IT specialist.

Local, Online & File Sync Backups

NovaBACKUP allows backup of important data on media like local and network drives, NAS, DVD, Tape, USB HDD and most other storage devices. It also allows to backup of important data on Online / Off-Site (Internet) like Cloud and FTP. Now you can backup locally, online and to your favorite file sharing services like Dropbox, OneDrive, Google Drive, iDriveSync, SkyDrive and SafeSync. You can now backup and recover data from anywhere.

Scheduled Automatic Backups and Copies

NovaBACKUP gives flexibility to backup up all email files, My Document, pictures etc. on single click. So even user does not have knowledge that at which path email database is stored, by single click NovaBACKUP will search for all emails database and backed up them to predefine destination. User do NOT need to have an expert knowledge of computers. NovaBACKUP allows to setup unlimited schedule to back important files, folder, email, database etc., with option of Full backup, Incremental back up, Differential backup and Snapshot backup. Novastor also support copy features. So all the predefine data will be copied at destination with same file/folder structure. So now NO need to remember to backup important data. Nova Allow to set **“Retention policy”**, so you can decide how many copies of backup set you want to maintain. So all old backup it will delete automatically and maintain the storage space it own.

Open File Backup and Copies

NovaBACKUP allows to take a back up of open files. Means even files of MS Word, Excel etc. and email client like Outlook, MS Outlook, Tally, AutoCAD etc are in use it can take a back up. NovaBACKUP works with Microsoft's Volume Copy Shadow Service (also known as VSS) in order to back up open files. The Open File Backup option is limited to operating systems that support Microsoft's VSS, including Windows 11, 10, and 8.1. Windows Server 2022, 2019, 2016, 2012 R2, and 2012. For Windows Servers with MS SQL, Exchange, VMware and Hyper-V • SQL 2019, 2017, 2016 SP2, 2014 SP3, 2012 SP4 / Exchange 2019, 2016, 2013 SP1, 2010 SP3.

Disk Imaging Disaster Recovery

Take a snapshot of entire system/computer OR server (Including Operating System, all installed software and Data) to protect and preserve data in the event of a disaster. Full and incremental mode Snapshot of system can be scheduled to get the latest image. NovaBACKUP allows to make bootable CD. With the help of Bootable CD system will start on RAM and then just browse to latest stored image and click on restore-to-restore entire system to its pre-disaster state. **Nova backup Universal Restore feature also allows to restore image on Dissimilar Hardware / Different Hardware.**

Smart and Simple Restore

A backup file list gives users the flexibility to restore all files or select files just like Windows Explorer screen. For the ultimate in flexibility, users can restore files with the option to overwrite existing files at original location or restore to an alternate location with same folder/file structure as original.

E-mail Reporting

NovaBACKUP sends status reports of backup or copy jobs via e-mail on pre-defined email ids. Report will content details whether backup job done successful or NOT. What it backed up in the job etc, How much time it takes, How much MB/GB data backed up etc. It also provide weekly and monthly summery report for analysis. No Need to configure SMTP, NovaStor uses its own.

Compress / Password Protected and Encrypted Backup

NovaBACKUP allows to back up the data in compression mode. This saves space at destination. You can also provide predefine password of your backup, so non of the unauthorized person can restore backup without password. Nova also allows encryption so backed up data can not be open using any third-party software for 100% data security.
