- A unique and powerful solution to make offsite backups to Amazon S3, Google Drive, Dropbox, Azure Storage, OneDrive, FTP or SFTP servers, Iperius Storage any any S3 compatible storage.
- Incremental Hyper-V (RCT) and VMware (CBT) backup. For ESXi, vCenter and ESXi Free. Replication even between ESXi Free hosts. Full or file-level recovery (granular restore). No per-socket, per-VM or per-host limitation.

Authorised Partner

Automatic email backup software to backup email on incremental mode.

- It can work with any email system.
- It can also work with G Suite, Office 365, MS Exchange, Lotus Notes, ZIMBRA, VPOP3, POP, IMAP etc.
- Fully searchable email backup for all users to search and restore email at will.
- MailVault fetch new email automatically from mail source (eg. every 10 Minutes) and send it to storage.
- Powerful search criteria like FROM, TO, CC, BCC, Subject, Word, Over any time range helps to search from.
- Backed up emails to retrieve and restore as it is at the event of mail lost.
- Archived email can be stored on any storage media like Hard disk, NAS etc.
- Support DE duplication, means it won't backup whole copy of email multiple time in storage to minimize storage.

Authorised Partner

MailStore's email archiving solutions allow you to retain your emails so that they remain available, retrievable, and always secure. MailStore is leading Email archiving solution having Head quarter in Germany. More than 80,000 customers have already placed their trust in MailStore. We are authorised partner of MailStore.

You can avoid email loss, because emails are archived the moment they are sent or received, their availability is safeguarded for years.

MailStore solutions support virtually all email systems.

- Microsoft 365
- Microsoft Exchange Server
- Google Workspace
- MDAEMON, Kerio Connect and IceWarp
- IMAP- or POP3-compatible servers
- Email clients such as Microsoft Outlook, Thunderbird etc.
- PST-files and other email files

Using rules to delete emails after they have been archived helps to keep the volume of emails on the server constantly low. Search and Retrieve Emails in a Breeze, users can browse their archive quickly and intuitively, then recover emails and their file attachments with a single mouse-click. Because de-duplication and compression, data held in the archive occupy up to 70 percent less space

Foxit PDF

- The all-in-one PDF solution that is built for business and optimized with AI.
- One app to create, edit, fill and sign documents
- Easily share PDF content by exporting PDF to Word, PowerPoint, Excel, RTF, HTML, text, and image formats. Export the whole document or just a selected area. Anyone who needs the PDF can always receive it in their preferred format.
- Create PDF, PDF/A, PDF/X, and PDF/E from virtually any file format or web pages.
- Organize and manipulate PDF pages to support your workflows. Merge and split documents; drag and drop pages within a file or from one document to another; and add stamps, watermarks, headers, footers, and more.
- Legally binding eSign capabilities integrated into the powerful and robust Foxit PDF Editor enable you to seamlessly create, eSign, and collaborate on documents within and outside the organization from within the same application.

Volume Partner

eScan Business products is a comprehensive antivirus and Information Security Solution that allows you to manage risk and protect your critical infrastructure efficiently with centralised Management console.

- Getting sold more than 155 countries worldwide since 1993.
- Complete proactive protection against Virus, Ransomware, Spyware, Web Phishing and Malware.
- Offering useful features like Internet Blocking, Website blocking, Firewall, USB blocking etc.

Gold Partner

- More than 26+ Antivirus software are using technology and engine of BitDefender.
- Award winning Antivirus software getting sold more than 180 countries.
- BitDefender support Hybrid Network like Windows, Linux and Mac OS to manage network users and remote users with single Console hosted on Cloud.
- Complete centralized management for Virus, Spyware, Phishing, Firewall, Website blocking, Application control, USB / DVD blocking etc.
- Get real time alert on BitDefender management console as well on email id in case of virus problem or update problem on any BitDefender End point security computer.

Authorised Partner

- Automatically detect and prioritize potential threats and quickly see where to focus attention and know which machines may be impacted
- Sophos Intercept X Advanced with XDR integrates powerful endpoint detection and response (EDR) with the industry's top-rated endpoint protection.
- Built for both IT security operations and threat hunting, Intercept X detects and investigates suspicious activity with AI-driven analysis. Unlike other EDR tools, it adds expertise, not headcount by replicating the skills of hard-to-find analysts.
- Ransomware file protection, automatic file recovery, and behavioral analysis to stop ransomware and boot record attacks
- Artificial intelligence built into Intercept X that detects both known and unknown malware without relying on signatures

Safetica is a Czech software company that provides Data Loss Prevention and Insider Threat Protection solutions.

- Protect to upload any attachment type OR any attachment on browser Or application eg. Gmail, Google Drive, One drive OR any FREE FTP sites.
- Manage data-flow to external devices and protect sensitive data from being printed OR take print screen.
- Avoid data leaks on remote endpoints or remote desktop connections.
- Restricts user to copy data on USB device OR only predefine USB Device.
- Centralized management of local drives and external devices with BitLocker encryption

We "**Nifty Solutions**" are volume partner of eScan. eScan an advanced security of Data Leak Prevention (DLP), Anti-Virus, Anti-Ransomware with Centralized Management Console products.

eScan eScan Data Leak Prevention (DLP)

(<https://escanav.com/en/windows-antivirus/escan-enterprise-DLP.asp>) is a set of strategies, technologies, and techniques that ensure end users do not transmit critical or sensitive data outside an organization.

Whether transmission of data is through message, email, file transfers, or some other way, information can end up in unauthorized locations, leading to compliance issues.

Key Technology Features

File Attachment Block

eScan-DLP Attachment block feature lets you control attachment flow within your organization. You can block/allow all attachments that a user tries to send through specific pre-defined processes.

Content-Aware Controls

This superlative feature enables the administrator to monitor & control the type of information which can be sent outside of the endpoint.

Workspace Application

Make sure user can login only corporate profile not able to login personal profile. For Eg ..Application or domain like gmail.com, O365, One drive etc.

Sensitive File Protection

This feature will ensure that sensitive data cannot be accessed using any other application except the default application specified. Once a folder is classified as "Sensitive", its contents cannot be changed / deleted in any way. The files can be accessed using only the associated apps and any kind of editing is blocked to avoid data modification.

Authorised Partner

Xstream Protection

Sophos Firewall's Xstream architecture protects your network from the latest threats while accelerating your important SaaS, SD-WAN, and cloud application traffic.

Deep Packet Inspection

Stop the latest ransomware and breaches with high-performance streaming deep packet inspection, including next-gen IPS, web protection, and app control, as well as deep learning and sandboxing powered by SophosLabs Intelix.

Application Acceleration

Accelerate your SaaS, SD-WAN, and cloud traffic such as VoIP, video, and other trusted applications automatically or via your own policies, putting them on the Xstream FastPath to optimize performance.

Expose Hidden Risks

Superior visibility into risky activity, suspicious traffic, and advanced threats help you regain control of your networks.

Authorised Partner

Firewall / Unified Threat Management

- Website Control features allows to provide internet to only certain users with specific website for data security and to increases the productivity of staff.
- Link Management / Fail Over allows to keep internet connectivity ON using secondary internet connection incase of primary internet connection down.
- Bandwidth Management allows to share your internet bandwidth amongst different application and users e.g. ERP, email, browsing etc. It ensure to get maximum benefit from internet bandwidth.
- Gateway Antivirus will scan all internet traffic at Gateway level for network Security.
- Virtual Private Network (VPN) allows to access your computer or application from any where using Internet safely. Only authorized user can access the network / application remotely.

RMail is product from RPost.com. It is providing AI base email security solution since 2000. Having Head Quarter and R&D centre based at California, USA. More than 25Million customer and partners in more then 190+ countries. RMail® add-in to Microsoft 365 Outlook not only includes dynamically adapting email encryption, but also protection against sophisticated BEC and email impostor threats with in-the-moment automated e-security training, wire fraud protection, and real-time recipient and domain address verification in addition to many other AI-infused protections for common human e-security errors. Control or Kill Access to sensitive documents even after it sent. You can send email with password protection so only authorize person can open your email. After sending an email you get complete details, who, when where open that sent email. You can attach a link of document upto 1 GB in email itself. So recipient can download the document by clicking on the link. so NO need to send large attachment Or upload on third party server.

Hosted Spam Filtering And Malware Protection For Businesses

Don't let annoying floods of spam emails get to you. Spam and viruses don't stand a chance against the best email spam filter on the market.

HELP PROTECT YOUR NETWORK FROM SPAM, VIRUSES, PHISHING, AND MALWARE ATTACKS

Eliminate spam email before it reaches your network with our proprietary, predictive, self-learning technology. Learning from millions of emails processed daily, the proprietary incoming email filtering system has a nearly 100% filtering accuracy rate.

DETECT NEW SPAM AND MALWARE OUTBREAKS IMMEDIATELY - SpamExperts continuously

collects and analyzes data to predict and instantly identify new spam outbreaks. This accumulated intelligence is shared real-time with all clients worldwide, ensuring timely protection against new threats

INCREASED EMAIL CONTINUITY

When your email server is unreachable, our system allows you full access (read, compose, answer) to the emails stored in our queue until your email server is back online. This provides an uninterrupted email flow and increased email continuity, helping prevent email from being lost or bounced back to the sender.

SAVE ON RESOURCES, MAINTENANCE, AND SUPPORT

N-able SpamExperts helps customers reduce resource usage while providing monitoring and regular release cycles with new product functionality. Optimize resources and offload your support by implementing N-able SpamExperts solutions.

Authorised Partner

Barracuda Email Protection

- Stop SPAM and Malware with Inbound Email.
- Barracuda Essentials quickly filters and sanitizes every email before it is delivered to your mail server to protect you from email-borne threats.
- Using virus scanning, spam scoring, real-time intent analysis, URL link protection, reputation checks, and other techniques, Barracuda provides you with the best possible level of protection.

Install Acronis Backup Software FREE on your Tally / ERP or any accounts finance data Server to backup data on Acronis Cloud.

Customizable backup scheduling Perform manual or automatic backups according to the desired schedule and frequency – monthly, weekly, daily, hourly, or even every 10 minutes

File Versioning will Not overwrite same data and maintain multiple copy without consuming more space for same data on Acronis cloud. This will help you to download any old retained file from acronis cloud.

You can set how much time you want to retain data / keep data on Acronis Cloud Server

Acronis

Authorised Partner

Acronis' Advanced Disaster Recovery enables you to restore operations in a few clicks, you can rapidly recover client workloads or services in the event of ransomware, hardware failure, and any other disruption. Disaster recovery for physical and virtual workloads, Site-to-site VPN connection, IPsec multisite VPN support, Custom DNS configuration.

Disaster recovery for physical and virtual workloads

Minimize downtime by enabling easy, scalable and efficient cloud based recovery of all popular workloads including Windows and Linux physical servers and VMs, major hypervisors, and Microsoft apps.

Production failover

Ensure quick and easy automated failover of the client's production environment to an offsite server running in the Acronis Disaster Recovery Storage.

Site-to-site VPN connection

Enable secure VPN connection between the client's local site and the cloud site to facilitate partial failover of tightly dependent servers on the local site. When one of the servers is recreated on the cloud site, the servers continue to communicate, ensuring minimal downtime.

Point-in-time recovery

Prevent data loss and avoid data corruption with granularity of control over data protection and recovery capabilities. Restore systems and data to any recoverable point in the past, instead of to the latest one.

Custom DNS configuration

Create custom DNS configurations for disaster recovery cloud services in the Acronis cloud. This enables you to easily adjust DNS settings for your clients – making it even easier for you to support them.

Dedicated Server and VPS

We do provide Dedicated Server and Virtual Private Server (VPS) on Windows and Linux environment to host your email solution OR any application like ERP Or database.

VPS Cloud Hosting

- A virtual private server (VPS) is a preferred hosting solution to host email solution, ERP, databases, Mobile application etc since it delivers control at a level similar to a dedicated server at a price not too far from affordable shared hosting.
- Typically, it has its own root access, files, processes, IP addresses and is capable of being rebooted independently. VPS performs and executes like an isolated standalone server.
- Each Instance of VPS Hosting comes with Guaranteed Ram and Disk Space.

Dedicated Servers

A dedicated server gives you the ultimate in control, security and power. A dedicated server refers to a single computer allocated to the needs of a single customer or business. Customers take on lease the hardware from hosting provider and generally receive network monitoring, internet bandwidth and routing equipment.

- Customer can connect to the server directly using SSH, Remote Desktop.
- Customer can install custom software as per their requirement.

Bulk Email Software:

- A stand-alone bulk mailer program can send automatic email to large email database as per scheduler
- Personalized email per recipient
Accepts mailing lists generated in .CSV, MS Outlook, Excel, Access, DBF, Word, made in ASCII text files (.txt, .lst)
- The numbers of email recipient are unlimited
- Scheduled Sending User friendly interface
- Time base number of email sending
- Multiple lists / groups management
- Single click sending
- Allow to compose and send messages in image, HTML and text format
- One time product cost.

Bulk Email Services

- By configure SMTP details like Host Address, User name and Password, in any email client as well any bulk email software to send large quantity emails.
- You can use your own domain base email account to send bulk email
- You can purchase email quota as per your monthly requirement. No daily restrictions - each account has a high monthly quota, up to 200,000 emails per month.
- Reliable and lightning-fast email delivery.
- SMTP service that has been designed for small to medium-sized businesses to send large quantity marketing and news letters kind of emails
- eg. name@yourdomain.com. Email will always be delivered using your email address / Domain at destination.

Computer Hardware And Network AMC/FMS

- We provide onsite computer repair services and network support for Small and medium-sized businesses
- Computer Annual Maintenance Contract (AMC)
- Computer Assembling, Branded Computer Installation
- Computer Repairing, Software Installation Support
- Networking and Trouble Shutting
- Facility Management Service (FMS)

License Software

Domain Registration

Reliable And economical domain name registration

- **DNS Management** Free lifetime DNS service which allows you to manage your DNS records on our globally distributed and highly redundant DNS infrastructure.

Web Hosting

- Hosting on Windows and Linux Server
- Havign our own dedicated server on Indian Data Center for fast performance.
- Create unlimited subdomain, FTP etc.
- Unlimited Email accounts can be created by customer them selves
- FREE SSL certificate with each Cpanel
- Our Linux has imunify360 license (<https://www.imunify360.com/>). It has Realtime Malware scanner, File Antivirus, Block all bad Bots, Malicious request, Brute-Force attacks to protect each hosted application/ website

Website Designing & Development

Creative web designing & development team for responsive static site, CMS site & Ecommerce Website

With modern technologies getting more powerful and widely supported by current browsers, the website has become a designer's canvas. It is here where artists show off their skills and vivid imagination. We contemplate website designs of all shapes and sizes that sport their gorgeous aesthetics and magnifying vibes in the digital expanses.

Effective website design is not only a beautiful face; it is also an outstanding user experience and excellent performance. Whatever gorgeous design you have, if it is difficult to navigate and retrieve important information, then it is a failure. Website design is a complex organism where all elements, even those that are hidden from the eye, work together to provide a perfect place.

SSL Certificate

SSL certificates protect all sensitive and private data transferring via websites and online systems. SSL products gain trust from end-customers and boost sales by increasing conversions. Certificates help to get higher ranking positions since Google added SSL certs to its algorithm. We provides all possible SSL certificates available on the market, starting with Domain validation till Extended validation certs.
